about me.

A versatile front-end developer with a keen eye for design. Passionate about crafting user facing products that just works. I have a sharp eye for design and can translate UI/UX designs into high-quality code.

Experiences.

Frontend Product Engineer - Lascade

Kerala → Jul 2026 - Present

Owned frontend architecture and technical decisions for a production product using Next.js, React, and TypeScript. Built scalable, responsive interfaces, implemented i18n across 10 languages, and integrated Sanity CMS for flexible content management. Drove improvements in SEO, performance, routing, state management, and reusable component systems while translating Figma designs into production-ready experiences.

Tech: Next.js, React.js, TypeScript, Tailwind CSS, Sanity CMS, i18n, SEO, Figma.

Founding Engineer - Asteriscus adtech

Kerala → Jan 2025 - July 2026

Founding team member at a startup building IoT-enabled digital in-transit media systems with full OTA control. Developed advertiser-facing platforms for creative uploads, campaign scheduling, and real-time device monitoring, while communicating with clients and cross-functional teams to gather requirements and deliver reliable features across distributed edge devices.
Stack: React.js, Javascript, Next.js, Tailwind CSS, Linux, Golang, Docker, Kafka, SQLite, Prometheus, Grafana, Loki, Terraform, NetworkManager/ModemManager, Rockchip boards, Raspberry Pi, systemd, shell scripting, CI/CD.

MTS - Vymo | MetaZ Digital

Bangalore → May 2024 - Jan 2025

Key developer for HDFC Bank's collections system (via Vymo), delivering critical fixes and enhancements for mission-critical fintech applications. Diagnosed and resolved high-impact issues, including complex Kafka and Airflow DAG problems. Built data integrations across MongoDB, MySQL, and Elasticsearch for reliable payment reporting.

Tech: Node.js, Express.js, Microservices, REST API, JWT, HTML/CSS, OAuth, Passport.js, JavaScript/TypeScript, MongoDB/Mongoose, MySQL, Jest Elasticsearch, Kafka, Airflow, SFTP, WebSockets, Git, Jira.

React Intern - GamersBack

Remote → Nov 2023 - Mar 2024

Enhanced the company website and admin panel using React (Vite) with responsive Tailwind components, building features within a monolithic architecture. Implemented JWT-based authentication, React Router navigation, and Redux for state management while improving component structure and overall application performance.

Tech: React.js, Vite, Tailwind CSS, Material UI, Context API, Redux, React Router, JWT, HTML/CSS, JavaScript, TypeScript, Responsive Design, Postman, Figma.

Achievements.

Chrome Extension (Security POC) - Manorama Media

November 2025

Identified a security vulnerability in Manorama Media's online magazine platform that allowed premium content downloads by bypassing access controls. Built a private Chrome extension as a proof of concept using content scripting, DOM interaction, and request manipulation to demonstrate the exploit, and responsibly reported the issue to the organization.
Demo Video

Tech: Chrome Extension (Manifest v3), content scripts, background workers, Chrome APIs, DOM interaction, CSP/CORS, Chrome DevTools, JavaScript/TypeScript.

Frontend Volunteer - People+AI

Remote → Jan 2025 - Mar 2025

Volunteered on Sunva AI, an opensource project supporting the deaf community through tech-driven communication tools

Education.

Chinmaya College

BCA

Recognition.

Lead - Campus Code Club

Nov 2020 - May 2023

Mentor - Tinker-Her-Hack | Tinkerhub Foundation

Kerala → Mar 2 - 3, 2024

Mentored a 24-hour hackathon at Vimal Jyothi Engineering College, guiding seven B.Tech teams with technical support and problem-solving insights.

Computer Science Tutor

Kerala → Dec 2020 - Present

Taught 11th and 12th-grade students programming, data structures, algorithms, databases, web development and software development concepts, fostering practical problem-solving skills through hands-on coding projects.

AI Integrations

VoiceNotes Clone
Walkthrough

Worked on frontend projects integrating AI APIs for voice processing, summarization, and content automation. Experience using Gemini, OpenAI, and Grok, handling API keys securely, and building user-facing features around AI-driven workflows across portfolio projects.

Tech: Gemini API, OpenAI API, Grok, AI/ML API integrations, secure API key handling, REST pipelines.
